

# ADA Pavers

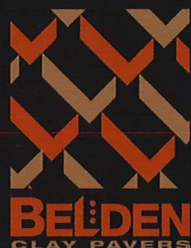

Available in 6 Popular Colors

The Belden Brick Company's ADA Pavers' truncated domes provide maximum traction, offer guidance for wheelchair and pedestrian access to streets and walkways, and create textural contrast. ADA Pavers blend in well with surrounding materials and have through-the-body color that won't fade over time. Belden's attractive ADA Pavers are designed to meet the accessibility guidelines of the American Disabilities Act for Detectable Warning and Loading Ramp applications. They also comply with ASTM Standard C902.
