Commercial Buildings

Imparting Style and Impact to Business.

Gaslight Square :: Bismarck Blend
Arlington, VA

The world is full of all different types of buildings. Although they share common elements, only those constructed of brick can exceed the design criteria for performance, longevity and appearance.

Manufactured from clay and shale, brick offers tones and textures giving today's structures their unique appeal. The strength and durability of brick provide protection from more than just the elements. Brick has been the choice for architects and builders seeking to create structures that embody both style and strength.

Today's architects and builders typically turn to The Belden Brick Company's Special Shapes Division. Here they find a dedicated group of artisans and craftsmen able to provide ever-more creative forms of brick to those interested in "designing with a difference".
