Midwest Express Center

Milwaukee, Wisconsin

This three-level state-of-the-art building was designed to replace existing convention facilities and also connect two major hotels with elevated walkways. At 667,000 square feet the Midwest Express Center occupies four city blocks and blends with historic downtown Milwaukee.

"The building itself feels at home with its neighbors...I compliment the architects. Their work is important." (Governor Tommy Thompson, Midwest Express Center Grand Opening, July 24, 1998) Brick used for this project were simulated Belcrest 330 Utility and 8621 accent brick.

Clarksburg Municipal Building

Clarksburg, West Virginia

Owned by the City of Clarksburg and designed by U.D.A. Architects of Pittsburgh, PA, this 32,700 square-foot building houses numerous city department headquarters. Brick chosen for the project include 503-505 Smooth accented with Midland Blend Smooth.

General Services Administration Federal Office

Clarksburg, West Virginia

Gates, Calloway, Moore & West designed this 41,000 square-foot federal office building featuring 470-479 Light Range Ironspots accented with 470-479 Dark Range Ironspots. The brick on this project were manufactured at Belden Brick Plant 4, one of the few plants in the country that still produce brick in periodic or "bee-hive" kilns. This project is an excellent example of Old World craftsmanship and modern design.

Good Samaritan North Hospital

Englewood, Ohio

Designed by healthcare specialists Earl Swensson Associates, this hospital offers several diagnostic services including cancer therapy, rehabilitation and sports medicine. The 147,000 square foot hospital also houses a community health information library and education center, pharmacy and café featuring heart-friendly meals. Brick used for this building is a combination of Mojave Blend, Princess Blend and Belcrest 130s.

Since 1885 – At the Belden Brick Company our 115 years of experience combine to manufacture the highest quality brick in the industry. Over the past century many brick manufacturers have come and gone. Because of our commitment to quality, continuous improvement and customer satisfaction we've been able to stand the test of time. Now in the fourth generation of the Belden family management, The Belden Brick Company makes a continuing promise to manufacture a quality product that remains the industry's standard of comparison.

Large Selection Of Colors, Sizes & Textures – Currently operating six manufacturing facilities and with another under construction, The Belden Brick Company has the capacity to produce over 200 million brick annually in over 150 color ranges, 13 textures and 17 different sizes. Because of our high quality raw materials and our quality manufacturing process, we are able to manufacture products that are a consistent match in color and size.

Special Shapes – Our Special Shapes department can help your visions become realities. The Belden Brick Company has made hundreds of different shapes to allow you to meet individual design requirements. Whether your design requires extruded, molded, or hand-shaped products, Belden Brick is ready to help you create your signature in the community. For dramatic visual appeal that also provides structural integrity, let Belden Brick help you design with a difference.

ISO 9002 – ISO is a series of quality assurance standards published by the International Organization for Standards to provide a worldwide set of quality system guidelines and requirements. ISO 9000 is the first consistent set of international standards available to evaluate a company's ability to provide a quality product. In 1994 The Belden Brick Company became the first U.S. brick manufacturer to obtain ISO 9002 certification and maintains ISO 9002 certification on a yearly basis.

Customer Service – Along with 240 distributors across the country, Belden Brick regional sales managers and our service and production personnel are available to help you select and receive a quality product that will last for many years to come. We pride ourselves on being able to facilitate quick response to any services or needs that our customers may require. Let our fast and friendly customer service agents help you to select the product that will best suit your next project.
